#### How To Use This Index

# This index lists all SCWA distribution areas for the water quality results on pages 44 through 53. Pages 31 and 32 have a guide for understanding your water quality and page 7 lists compounds that were <u>not</u> found in our drinking water.

Find the town or community of interest in the first column labeled "TOWN". Next to the town under the second column labeled "DISTRIBUTION AREA", is a number. This is the number of the Distribution Area which serves water to your home, school, business or other area of interest. You can then find this Distribution Area in one of the water quality tables located on pages 33 through 40. Many of the towns listed in this index are served by more than one Distribution Area, so please read the street descriptions carefully.

The map on pages 42 and 43 shows the boundaries of each area. If you locate your town or community, you can use the map rather than the Index to find your Distribution Area. Also listed on the map are the number of wells which serve each Distribution Area.
